MUSKAAN HUSSAIN

Construction Management · Architect · AI Enthusiast
Brooklyn, NY | muskaannhussainn@gmail.com | +1 (347) 930-1199 | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

Construction management professional with 4+ years across project delivery, field coordination, cost estimating, scheduling, and BIM coordination on high-rise, commercial, aviation, institutional, laboratory, data center, and residential projects, including JFK Terminals 1 and 6, Bank of New York, Barclays Center, and Apollo Theater. Hands-on with RFIs, submittals, change orders, bidding, procurement, permitting, and subcontractor coordination; applies AI tools, custom plugins, and Python and Excel automation to cut manual reporting and estimating work. Registered architect (India). MS Construction Management candidate at NYU Tandon.

EDUCATION

NYU Tandon School of Engineering, New York, USA **09/2025 – 05/2027**
MS Construction Management, GPA 3.9 | Concentration with NYU Stern: Real Estate Development and Entrepreneurship
Coursework: BIM, Cost Estimating, Project Scheduling, Contracts and Specifications, Construction Law, Construction Accounting and Finance, Risk Analysis, Construction Marketing, Real Estate Development

Jawaharlal Nehru Architecture & Fine Arts University, Telangana, India **06/2018 – 06/2023**
Bachelor of Architecture, GPA 3.8

SKILLS

Project Management: Procore, Primavera P6, Primavera Risk Analyzer, MS Project, Bluebeam Revu, Autodesk Construction Cloud (ACC), BIM 360
BIM and Design: Revit, Navisworks, AutoCAD, Civil 3D, Dynamo, ArchiCAD, SketchUp, Rhino, Enscape, 3ds Max
Reality Capture and VDC: Track3D, OpenSpace, Revizto, Autodesk ReCap, CloudCompare, Insta360
Automation, AI, and Game Engines: Python, C#, PyRevit, Excel VBA, Power Query, BeamAI, Unity 3D, Unreal Engine
Competencies: High-Rise and Commercial Construction, Project Controls, CPM Scheduling, Cost Estimating and Budget Tracking, Quantity Takeoff and BOQ, Bidding and Procurement, Contracts and Specifications, RFIs, Submittals, Change Orders, Permitting and Regulatory Approvals, Subcontractor and Site Coordination, HVAC and MEP Coordination, Mission-Critical Facilities (Data Center, Lab), Design-Bid-Build, Design-Build, Constructability Review, QA/QC, Safety Documentation, Closeout, BIM Coordination and Clash Detection
Certifications: OSHA 30-Hour Construction Safety (2026); Procore Certified; Construction Estimating: Specifications and CSI MasterFormat; SWAC; Architect (Council of Architecture, India); IGBC Green Associate; Certificate in Functional English (IGNOU)
Languages: English, Spanish, Hindi, Urdu, Gujarati

PROFESSIONAL EXPERIENCE

Engineta, LLC (Curtis Partition) **05/2026 – 08/2026**
VDC Intern, New York, NY | High-rise, commercial, aviation, and venue projects: JFK Terminals 1 and 6, Bank of New York, Barclays Center, Apollo Theater, QIAA

- Led weekly coordination meetings with site foremen, trade partners, and general contractor teams from Turner Construction, AECOM Hunt, Tishman, Holt Construction, and Shawmut; authored weekly progress reports for project leadership.
- Validated installed quantities against coordinated models in Track3D, Bluebeam, and Autodesk Construction Cloud, flagging field discrepancies to project engineers and superintendents.
- Performed trade coordination in Revit against as-built conditions, resolving clashes and supporting RFIs with field-verified data.
- Managed daily 360-degree site captures and laser scans (40+ per week), integrating scan data into Track3D progress tracking.
- Applied AI tools to streamline documentation and reporting, building custom plugins, Python scripts, and Excel VBA macros that merge payroll and man-day data into labor budget variance reports, flagging cost deviations and cutting report prep by 70%.

NYU Tandon School of Engineering **01/2026 – 05/2026**
Project Assistant, Campus Planning & Technical Services, New York, NY | Research lab, data center, and public realm renovations across the NYU Tandon Brooklyn campus, including 2, 3, 5, and 6 MetroTech Center and 370 Jay Street

- Produced conceptual plans, sections, public realm design, and technical documentation in Revit, AutoCAD, and SketchUp for research lab, data center, and campus renovation approvals.
- Performed space planning in Bluebeam, tracking room usage and planning faculty and department moves with facilities staff.

Haddonstone **06/2024 – 08/2025**
BIM Engineer, Colorado, USA | Cast-stone facade, site, and landscape packages for residential, commercial, and institutional buildings

- Modeled 35+ cast-stone facade, site, and landscape packages in Revit across US, UK, and India teams; designed a custom Revit and AutoCAD facade documentation system with customized tool palettes, adopted company-wide as production standard and reducing drawing errors through automated modeling and quality checks.
- Reviewed shop drawings for fabrication and client approvals, resolved detailing conflicts with architects and contractors, and coordinated revisions from design changes and RFIs; presented cast-stone solutions to NYC firms including Stonehill Taylor.
- Performed quantity take-offs and material schedules from BIM models for estimating and procurement, integrating BeamAI and custom AI tools to auto-calculate quantities for faster, more accurate client quotations.

Signature Solutions **07/2023 – 05/2024**

Junior Architect, Fall River, MA | Residential, commercial, and government buildings in New York and Massachusetts: architecture, retrofit and renovation, interior design, shop drawings, and renderings

- Produced permit-ready and construction drawing sets in Revit and AutoCAD for 10+ residential, commercial, and government projects in New York and Massachusetts; prepared and responded to RFIs and submittals through closeout.
- Owned project schedules and budgets for 10+ renovation projects from bidding and procurement through permitting and closeout, coordinating subcontractors, consultants, and regulatory authorities to hold dates and costs.
- Managed design-bid-build delivery including bidding, purchasing and procurement, logistics, and contracts and specifications; reviewed construction contracts and legal documents.
- Led client and consultant meetings, coordinating change orders and approvals; produced 3D visualizations for 40+ client presentations; handled documentation control and hour tracking.

Archpainted **06/2022 – 06/2025**

Architect, Construction Manager, and Project Manager | Interior design and fit-out practice, residential, commercial, and retail

- Delivered 10+ buildings through construction completion and designed 40+ residential, commercial, retail mall, institutional, and interior fit-out projects ($1M – $10M each), including Nestlé laboratory and data center (server room) spaces (LAB SOLUTIONS), an Indian Army building (Delhi), a tunnel development (Saudi Arabia), and a residential building for Yonatan Stein Architects Ltd (Middle East).
- Served as construction manager on 10+ buildings: prepared construction drawings, BOQs, and specifications; coordinated contractors, consultants, and vendors; managed schedules, budgets, site supervision, and revisions through handover.
- Led interior design as the practice's core service: concept, layouts, material and finish specifications, lighting, custom furniture design and detailing, and on-site installation, including laboratory space planning.
- Delivered documentation in Hebrew, Arabic, and Portuguese for clients in the Middle East and Portugal; led the practice's marketing and business development.
- Clients: HABYTA (modular timber homes, Portugal), Yonatan Stein Architects Ltd (Middle East), LAB SOLUTIONS, UrbanZen, RS Design & Construction, RR Associates, and private clients globally.

Maple Renaissance **01/2022 – 06/2023**

Assistant Project Manager, Mumbai, India | Projects: Microsoft facilities, Katara Building

- Oversaw logistics, resource coordination, scheduling, procurement, and on-site coordination for 2 concurrent commercial projects, maintaining photographic progress reports for clients.
- Tracked project budgets, reviewed subcontractor invoices and pay applications, and served as direct client contact.

360Life Design Studio **08/2022 – 01/2023**

Intern, Hyderabad, India | Projects: Vertical Forest high-rise residential tower, theaters, commercial and residential buildings

- Prepared BOQs and conducted site visits across theaters, commercial, and residential projects; on the Vertical Forest high-rise tower, converted 2D AutoCAD drawings into a coordinated Revit BIM model, supported HVAC BIM coordination, and produced design and renderings.

RESEARCH

NYU Tandon Building Informatics & Visualization Lab (biLAB) **09/2026 – 12/2026**

Independent Study (MS coursework), New York, NY | Advised by Prof. Semiha Ergan

- Member of the lab's AI-powered, robot-assisted modular construction research: built AR, VR, and XR simulation environments in Unity 3D (C#) from Revit models, used to train robotic assembly steps; prepared Revit materials and 3ds Max assets; tested simulation workflows, identified and resolved modeling errors, and produced presentations for the research team.
- Developed Python tools for progress monitoring and anomaly detection from jobsite capture data in support of digital twins and AI/ML-driven construction automation research; contributed to research documentation and publication preparation.

The Urban Flux **12/2024 – 08/2025**

Researcher | Germany-based urban planning and computational design company

- Main project: built AI-driven, urban-scale 3D simulations in Rhino to test how local building codes and zoning rules, which differ by city and country, apply to buildings inside planning software.
- Researched how AI-driven simulation improves urban-scale planning tools and which workflows can be automated.
- Built Python scripts in PyRevit connected to Meta AI models to automate modeling and data tasks.

Kastor (personal research project) **2026 – Present**

- Unity 6 construction-site visualization built from a Revit FBX model with workers, equipment, lighting, and materials; rendered stills and camera flythrough videos; preparing a research write-up for publication.

TEACHING, PUBLIC SPEAKING, AND INTERESTS

Guest Lecturer, Vaishnavi School of Architecture and Planning (04/2025): career development lecture to 70+ final-year students, Revit and BIM workshops for 15+ students, and one-on-one mentoring for 10+ students. Lunch and learn presentations. CMAA Metro NY/NJ Chapter, student member.

Interests: Painting, AI, learning new software and languages, public speaking, creative and self-development
